Off-property exposure (current human)	Eco exposure	Drinking water affected	Past Activities
yes	yes	Yes	EPA Regions 3 & 5 issued an emergency order under the Safe Drinking Water Act and revised it once to include the goal of treating water supplies to below the lifetime health advisory.
yes	unknown	Yes	United Water System and Airport sampled under UCMR.
yes	unknown	Yes	Public water supply well sampled under UCMR. No known contamination source. Site is one mile from a local, small airport. PADEP sampled about 250 private wells nearby. Five properties receiving bottled water and 2 got carbon filters.
unknown	unknown	Yes - unused well	Former Nike missile site later used by the Army Corps of Engineers for fire fighting training. Site is inactive and unoccupied. Township sampled on-site wells. Former base drinking water well has PFOS/PFOA levels above the health advisory.
NA	NA	no	Aqua PA had below-HA detections in 18 of 20 Bucks and Montgomery Co wells. Detections may be associated with Willow Grove.
yes	unknown	Yes	North Penn independently sampled the two East Rockhill wells. One exceeded the health advisory level with 117 ppt of combined PFOS+PFOA. The sample from other well contained 65 ppt combined PFOA+PFOS and is still in-service. 125 homes sampled.
yes	unknown	yes	1 well exceeded (Big Springs Well). Also sampled private wells to identify extents of PFOS and possible source.

Exposure addressed	On-going or planned activities	Future Implications	Media Interest	Last update
Chemours has provided alternate water where necessary. Sampling is ongoing. Private wells receive GAC treatment or are hooked up to public supply if possible. Chemours maintains the GAC systems and tests the water quarterly.	EPA and state now looking into GenX releases and possible contamination in drinking water supplies. And PFOA/PFOS sampling continues.		yes	29-Sep-17
United Water well taken offline at the Airport, system re-worked to enable continued operation without the well. Airport had 4 wells impacted, installing treatment under DEP permits.			no	29-Sep-17
Well shut down in May 2016. 5 properties received bottled water. 2 properties received carbon filters.	Sampling. Monitoring well installation will start soon.		no	05-Oct-17
	Off-site sampling in progress. Sampling and characterization is ongoing.		no	05-Oct-17
One Hatboro well (off line for 2 years) had combined value of 99 ppt (9/16/16 retested at 63 ppt) and one well in the Chalfont area had 68 ppt combined PFOA/PFOS and was shut down. The Chalfont well was retested at 19 ppt and most recently at 40.2 ppt, r	Continued monitoring.		no	29-Sep-17
North Penn shut down the well with the exceedance, is supplementing with purchased water from Perkasio Borough, was arranging to resample and was preparing to notify their customers of the findings. 5 properties receiving bottled water and 1 has carbon fi	State is sampling nearby private wells.		yes	05-Oct-17
Big Springs Well shut down and will install GAC filter (currently out for bid).	GAC will be installed. Discussions with ANG ongoing regarding possible source.		yes	06-Oct-17
